TRENCH SHOCK

COMMANDER'S MANUAL

TS-200 • Version 0.3 • DRAFT PLAYTEST RULES

"Every rule must create a meaningful decision."

Purpose. This manual contains the rules players need at the table. Card text may create specific exceptions; when it does, follow the card.

Current rules consolidated September 2, 2026

14. Quick Reference
15. Core Terms

Recommended first game. Play a Standard Battle: 10 rounds with a 12-card Mission deck. Keep this manual open to the Round Sequence and Quick Reference sections during play.

1. Winning the Battle

Trench Shock is a two-player tactical battle fought across opposing trench lines and a shared Objective Zone. You earn Victory Points (VP) by taking ground, completing Missions, and breaking a Tank into the enemy Trench.

1.1 Choose the Battle Length

Battle Format	Rounds	Mission Deck	Remove Before Play
Short Engagement	8	10 Missions	6 Missions face-down
Standard Battle	10	12 Missions	4 Missions face-down
Extended Battle	12	16 Missions	None

There is no VP target. Reaching a particular VP total never ends the game by itself.

1.2 Normal Victory

After the selected final round is fully resolved, the player with the most VP wins.

1.3 Early End: Mission Exhaustion

If a player is required to draw a Mission Card and no Mission Cards are available, the game ends immediately. Determine the winner using the current VP totals and the normal tiebreakers.

1.4 Tiebreakers

1. The player controlling the Objective Zone wins.
2. If neither player controls the Objective Zone, or it is Contested, the player controlling the most enemy-side Zones wins.

3. If still tied, the game is a Draw.

2. Battlefield and Control

Each player has a Trench and three numbered battlefield Zones on their side. The shared Objective Zone lies between the two sides. "Enemy-side Zone" means one of your opponent's Zones 1–3; it never includes the Objective Zone.

2.1 Control Value

Element	Control Value
Exposed Soldier	1
Soldier in Cover	2
Undamaged Machine Gun	2
Undamaged Mortar	2
Damaged Machine Gun or Mortar	0
Tank	0 — and makes the zone Contested

You control a zone when you have the greater eligible Control Value there and the zone is not Contested. If Control Values are tied, neither player controls the zone.

2.2 Tanks Contest Zones

Any zone containing a Tank is Contested and controlled by neither player, regardless of how much other Control Value is present. A Tank never adds Control Value.

Control changes immediately. Whenever movement, casualties, deployment, repair, or another effect changes the pieces in a zone, re-evaluate Control immediately. Territorial VP are scored when Control is gained, not at the end of the round; gaining Control solely because a Tank departed awards no VP.

3. Setup

1. Choose a Battle Format: 8, 10, or 12 rounds. Prepare the matching Mission deck shown in Section 1.1.
2. Shuffle the active Mission deck and deal 2 Missions to each player. Keep Missions secret.
3. Prepare each player's 7-card starting Event hand: 2 Reinforce, 1 General's Order, 1 Patrol, 1 Charge, and 2 random cards from the 38-card regular Event deck.
4. Place the remaining 34 regular Events face-down as the Event Deck. Turn the top 3 cards face-up beside it to form the Event Display.
5. Shuffle the 12 Cover tokens so Defense values are hidden. Give each player 1 random concealed Cover token and keep it aside until after starting Soldiers are deployed. Keep the remaining Cover tokens in the shared supply.
6. Each player places 5 Soldiers in Zone 1, 5 Soldiers in Zone 2, and 3 Soldiers in the Trench reinforcement area. Zone 3 begins empty.
7. After starting Soldiers are deployed, each player places their concealed starting Cover token in any one of their own Zones 1-3. It may not be placed in a Trench or the Objective Zone and begins empty.
8. All Tanks, Machine Guns, and Mortars begin undeployed in each player's available supply.
9. Use the Cover space printed in each player's Trench as that player's Current-Round Casualties area.
10. Set both VP totals to 0, place the Round marker on Round 1, and begin the normal Initiative Phase. There is no separate starting-player roll.

3.1 Trench Reinforcement Area

The reinforcement area may hold a maximum of 5 Soldiers. Soldiers there are not on the battlefield and do not contribute Control. There is no automatic Soldier reinforcement at the end of a round.

4. Round Sequence

Every round follows the same structure. The Initiative winner becomes Player 1. Player 2 commits Action Dice first; Player 1 commits after seeing Player 2's visible pool. Player 1 then completes an entire Action Phase before Player 2 begins.

Order	Phase
1	Initiative
2	Player 1 Action Phase
3	Player 2 Action Phase
4	Regroup
5	End-of-Round Resolution

4.1 Action Phase Order

Step	Action
1	Shock Option
2	Tank Movement
3	Event Step
4	Deploy / Repair
5	Soldier Movement
6	Cover / Shovel Actions
7	Attack

Do not alternate actions. Player 1 completes all seven Action Phase steps before Player 2 begins. Within a step, the active player chooses the order of their legal actions unless a rule says otherwise.

5. Initiative and Action Dice

At the beginning of each round, both players roll all 5 Action Dice. This is the Initiative Roll (Roll 1). Roll 1 determines Initiative only; Wilds are ignored for Initiative. Once Initiative is determined, it is fixed for the round and is never changed by later Action-dice rerolls.

5.1 Initiative Ranking

Compare the best combination shown by each player, ignoring all Wild results:

1. Five of a Kind
2. Four of a Kind
3. Full House (three of one symbol and two of another)
4. Three of a Kind
5. Two Pairs
6. One Pair

If equal-ranked combinations must be compared, or neither player has a ranked combination, use this symbol ranking:

Initiative symbol rank Bayonet > Whistle > Shovel > Boot

Wilds are completely ignored for Initiative. They do not form combinations, substitute for symbols, or break ties.

5.2 Initiative Ties

If Initiative is tied, both players reroll all 5 Action Dice and compare Initiative again. Continue until the tie is broken. All tied rolls are discarded. The first non-tied Initiative roll becomes each player's current Action Dice pool, and the normal 2 post-Initiative rerolls are still available; tie-break rerolls do not count against them.

5.3 Action-Dice Rerolls and Commitment

After Initiative is fixed, Player 2 completes any optional Roll 2 and Roll 3 first. Before each roll, Player 2 may keep any dice from the current pool and reroll any others.

When Player 2 stops or completes Roll 3, Player 2 commits all 5 dice and assigns eligible Wilds. The committed dice and Wild assignment remain visible. Player 1 then completes any optional Roll 2 and Roll 3 using the same keep-and-reroll rules.

When Player 1 stops or completes Roll 3, Player 1 commits all 5 dice and assigns eligible Wilds. Initiative never changes after Roll 1. After both players commit, Player 1 begins the Action Phase.

General's Order is resolved after Roll 1 but before Initiative is determined. If it changes Roll 1, use the modified Roll 1 to determine Initiative. After Initiative is fixed, dice affected by General's Order may still be rerolled normally during Roll 2 or Roll 3.

Example — Shaping the Dice for Movement

Roll 1: Bayonet, Bayonet, Wild, Boot, Shovel. Initiative is determined from that Roll 1 while ignoring the Wild. The player wants movement, so after Initiative is fixed they keep the Wild and Boot and reroll the other 3 dice.

Roll 2: the 3 rerolled dice show Boot, Wild, Bayonet. The current pool is now Boot, Boot, Wild, Wild, Bayonet. For Roll 3, the player keeps the 2 Boots and 2 Wilds and rerolls only the Bayonet.

Roll 3: the rerolled die shows Whistle. The pool is Boot, Boot, Wild, Wild, Whistle. When committing, the player assigns both Wilds to Boot because Boot is naturally present. The committed pool therefore provides 4 Boots and 1 Whistle. Initiative remains the result determined from Roll 1.

5.4 Action Die Faces

Face	Use
Boot	Move eligible non-Tank Units.
Shovel	Dig In, Leave Cover, Prepare Position, or Relocate Position.
Bayonet	Deploy equipment or repair Damage.
Whistle	Play Events during the Event Step; draw Events during Regroup.
Wild	Copy a natural Action symbol in your committed pool.
Five matching Action Dice	May be spent for one Shock Option.

An Action Die has two Boot faces and one each of Whistle, Wild, Shovel, and Bayonet.

5.5 Wilds

- When committing Action Dice, assign all eligible Wilds to 1 non-Wild Action symbol naturally present in that committed pool.

- All Wilds in the committed pool copy the same assigned symbol for the entire round.
- If the committed pool contains no natural non-Wild Action symbol, its Wilds cannot be assigned and are unusable.
- Wilds can be used for normal actions and Shock, but never alter Attack Dice or the Mortar Die.
- For Shock, at least 1 non-Wild die in the committed pool must naturally show the copied symbol. An all-Wild committed pool cannot create Shock.
- Unused Wilds cannot become natural Whistles for Regroup Event draws.

6. The Action Phase

6.1 Step 1 — Shock Option

If you have 5 Action Dice showing the same Action symbol, including eligible Wilds, you may spend all 5 to resolve one Shock Option. Shock is optional. The five dice are consumed and cannot also be used for normal actions.

Current Shock Options are Mission Gambit and Mustard Gas. See Section 11.

6.2 Step 2 — Tank Movement

Each Tank may move 0, 1, or 2 zones forward. Tanks never move backward and never spend Boots. A Tank may move through enemy-controlled zones and through zones containing enemy Soldiers, Machine Guns, or Mortars.

If a Tank enters a zone containing an enemy Tank, it must stop there and cannot move through that zone while the enemy Tank remains.

If a Tank moves from the opponent's Zone 1 into the opponent's Trench, immediately score 1 VP. Remove that Tank from the battlefield and return it to your available Tank supply.

6.3 Step 3 — Event Step

This is the normal window for playing Event Cards. Spend 1 Whistle to play 1 Event Card from your hand. An Event played during this step must already have been in your hand when the Event Step began. You cannot draw Events during the Action Phase.

Some cards specify another timing. Follow the card. General's Order is played after Roll 1 but before Initiative is determined and does not require a Whistle.

6.4 Step 4 — Deploy / Repair

Cost	Action
1 Bayonet	Remove 1 Damage from a friendly Machine Gun, Mortar, or Tank anywhere on the battlefield.
2 Bayonets	Deploy a Mortar into your Zone 1, only if you control that zone.
3 Bayonets	Deploy a Machine Gun into any zone you control on your own side (Zones 1–3), never directly into the Objective Zone.
4 Bayonets	Deploy a Tank into your Zone 1 regardless of Control. Its presence immediately makes the zone Contested.

Bayonets are divisible among different legal actions, but costs must be paid in full. Unused Bayonets do not carry to a later round.

6.5 Step 5 — Soldier Movement

Spend 1 Boot to move 1 eligible non-Tank Unit 1 zone forward or backward. The same Unit may spend more than 1 Boot during the round if otherwise eligible. Tanks never use Boots.

A Soldier in Cover cannot move directly. During Soldier Movement, that Soldier may spend 1 Shovel immediately before moving to Leave Cover; it becomes exposed in the same zone, then may spend a Boot to move. This is the only Shovel action allowed before the normal Cover / Shovel step.

Machine Guns and Mortars may move with Boots. If either Unit moves during a round, it cannot attack or participate in Combined Fire that round. If it attacks or participates in Combined Fire, it cannot move that round.

6.6 Step 6 — Cover / Shovel Actions

Spend 1 Shovel for exactly one of the following actions:

Action	Effect
Dig In	Move 1 exposed friendly Soldier in the zone into an eligible Cover Position. Capacity is 3. You may Dig In even when enemy Soldiers are in the zone, but opposing Soldiers may never share the same Cover Position.
Leave Cover	Move 1 friendly Soldier out of Cover. It becomes exposed in the same zone.
Prepare Position	Place 1 random face-down Cover token from the available Cover supply into any zone you control. Starting Cover is already deployed during setup and is not taken from the shared supply.
Relocate Position	Move 1 empty Cover Position 1 zone into an adjacent zone you control. Occupied Cover cannot be moved.

6.7 Step 7 — Attack

Attacks do not require Action Dice. Resolve eligible attacks in any order. By default, each Unit may attack, or participate in an attack, only once during its turn.

A Tank chooses either a normal attack or Overrun as its attack. A Unit that participates in Combined Fire has used its attack for the turn.

If an Event Card instructs a Unit to make an attack, that attack uses the Unit's normal one-attack allowance. The Unit cannot attack again during the normal Attack step unless the Event explicitly grants an additional attack or says the Event attack does not count. An Event effect that merely generates Hits, casualties, Damage, Cover destruction, or Retreat without instructing a Unit to attack is not a Unit attack.

7. Units

Unit	Deploy	Attack	Range	Durability	Control
Soldier	Starts / reinforcement	1 Attack Die each	Same or adjacent zone; Tank only same-zone Close Assault	Eliminated by Hits	1; 2 in Cover
Machine Gun	3 Bayonets	3 Attack Dice; 4 when firing into Objective	Up to 2 zones	2 Damage	2 undamaged; 0 damaged
Mortar	2 Bayonets	Mortar Die; successful strike = 2 Hits	Zone determined by Mortar Die	2 Damage	2 undamaged; 0 damaged
Tank	4 Bayonets	3 Attack Dice or Overrun	Same or adjacent zone	3 Damage	0; makes zone Contested

7.1 Soldiers

- Each Soldier contributes 1 Attack Die.
- Soldiers may attack Soldiers, Machine Guns, and Mortars in the same or an adjacent zone.
- Soldiers may attack Tanks only by Close Assault from the Tank's zone.
- Each Hit from a legal Close Assault causes 1 Tank Damage.
- Soldiers may occupy Cover and are the main source of territorial Control.

- Forced Retreat sends a Soldier directly to its Trench reinforcement area. If that would exceed the 5-Soldier capacity, excess retreating Soldiers are eliminated.

7.2 Machine Guns

- Attack with 3 Attack Dice, or 4 Attack Dice when firing into the Objective Zone.
- Range is up to 2 zones; intervening Units and Cover do not block fire.
- A Machine Gun may move or attack in a round, not both. Participating in Combined Fire counts as attacking.
- Cannot target Tanks.
- May participate in Combined Fire with eligible Soldiers and other Machine Guns.
- At 1 Damage, a Machine Gun is disabled: it cannot move, attack, join Combined Fire, or contribute Control until repaired.
- The second Damage destroys it. A destroyed Machine Gun returns to the available supply with Damage removed.

7.3 Mortars

- A Mortar may move or attack in a round, not both.
- When it attacks, roll the Mortar Die. Z1, Z2, and Z3 target the opponent's corresponding numbered zone; Objective targets the shared Objective Zone; a blank is a miss.
- A successful attack generates 2 Hits. Allocate those Hits among eligible enemy targets in the affected zone before revealing any hidden Cover Defense.
- Hits cannot be reassigned after allocation. Excess or ineffective Hits are lost.
- Mortars cannot target Tanks and never cause friendly fire.
- At 1 Damage, a Mortar is disabled until repaired. The second Damage destroys it.

7.4 Tanks

- Tanks move 0–2 zones forward during Tank Movement and never spend Boots.
- A Tank attacks one legal target in its current or an adjacent zone with 3 Attack Dice.
- Tanks may attack enemy Tanks normally.
- Tanks cannot target Cover with a normal attack and never join Combined Fire.
- Tanks have Damage Capacity 3. Each legal Hit causes 1 Damage; there is no Defense threshold and no degradation at 1–2 Damage.
- Any Tank makes its zone Contested.
- Instead of a normal attack, a Tank may Overrun one occupied or empty Cover Position in its current zone.
- Entering the opponent's Trench from enemy Zone 1 scores 1 VP, then the Tank returns to available supply.

8. Combat

8.1 Attack Dice

A standard Attack Die has 3 Hit faces and 3 Miss faces. Roll the required number of dice, count Hits, and resolve them against the declared target or according to the Mortar rules.

8.2 Declare a Legal Target

A direct-fire attack declares one legal target before rolling. A target may be an exposed Soldier group in a zone, Soldiers occupying one Cover Position, one Machine Gun, one Mortar, one Tank when the attacker can legally target Tanks, or one empty Cover Position when the attacker can legally target Cover.

8.3 Damage and Casualties

Target	Each Hit Does	Destroyed / Eliminated

Target	Each Hit Does	Destroyed / Eliminated
Exposed Soldiers	Eliminates 1 Soldier	Place eliminated Soldiers in Current-Round Casualties.
Soldiers in Cover	Cover first absorbs Hits equal to Defense; each remaining Hit eliminates 1 occupant	Excess Hits after the last occupant are lost; Cover survives.
Machine Gun	1 Damage	Second Damage destroys.
Mortar	1 Damage	Second Damage destroys.
Tank	1 Damage	Third Damage destroys.
Empty Cover	Counts toward hidden Defense	Destroyed if Hits equal or exceed Defense.

8.4 Combined Fire

Eligible Soldiers and Machine Guns may combine their Attack Dice against one declared target. Participants may be in different zones, but every participating Unit must independently have legal range and be able to target the declared target. Mortars and Tanks never join Combined Fire.

Each participating Unit uses its one attack for the turn.

8.5 Tank Overrun

Instead of its normal attack, a Tank may destroy 1 occupied or empty Cover Position in its current zone. Do not roll Attack Dice and ignore Cover Defense. If Soldiers occupied the Cover, they survive and become exposed in the same zone. The Tank takes the Destroyed Cover token as a trophy.

8.6 Destroyed Equipment

Destroyed Machine Guns, Mortars, and Tanks return to their owner's available supply with all Damage removed. They may be redeployed later by paying the normal cost.

9. Cover Positions

Cover is a finite shared battlefield resource. There are 12 Cover tokens: five Defense 1, four Defense 2, two Defense 3, and one Defense 4. Defense stays hidden until needed to resolve an attack; once revealed, it remains revealed.

9.1 Occupancy

- Only Soldiers may occupy Cover.
- Each Cover Position holds up to 3 Soldiers.
- A zone may contain any number of Cover Positions.
- Opposing Soldiers may occupy different Cover Positions in the same zone, but may never share the same Cover Position.
- Each Soldier in Cover contributes Control Value 2.

9.2 Attacking Occupied Cover

When Soldiers in Cover are attacked, reveal the Cover Defense if necessary. The Cover absorbs Hits equal to its Defense. Each Hit remaining after that eliminates 1 occupying Soldier. If the last Soldier is eliminated, any further Hits are lost; they do not damage the Cover. A separate attack is required to destroy the now-empty Cover.

9.3 Destroying Empty Cover

Soldiers, Machine Guns, and Mortars may attack an empty Cover Position if otherwise eligible. Reveal its Defense if necessary. If the attack assigns Hits equal to or greater than Defense, destroy the Cover. The attacking player takes the token. Destroyed Cover does not return to the shared supply.

10. Events

Event Cards represent tactical opportunities, disruption, and battlefield uncertainty. Each player may hold up to 7 Events.

10.1 Playing and Drawing Events

- During your Event Step, spend 1 Whistle to play 1 Event that was already in your hand when the step began.
- During Regroup, spend each unused natural Whistle to draw 1 Event, up to the 7-card hand limit. There is no automatic Event draw.
- For each Event draw, take 1 of the 3 face-up cards in the Event Display or blindly draw the top Event Deck card. Immediately replace a displayed card that is taken.
- Events drawn during Regroup cannot be played until the following round. General's Order remains an Initiative-timing exception and requires no Whistle.
- If a card gives a specific timing or directly overrides a normal rule, follow the card.

10.2 Christmas Truce

Christmas Truce is a full ceasefire for the remainder of the round: neither player may make attacks or resolve an Event or Shock effect that directly causes enemy casualties, Damage, Cover destruction, or forced Retreat. It does not undo hostile effects already resolved before the card was played.

11. Missions and Shock

11.1 Mission Hand

Each player begins with 2 Missions. Your normal Mission hand limit is 5. If a Mission effect temporarily gives you more than 5, finish resolving the effect, then choose Missions to discard to the bottom of the Mission deck until you hold 5.

11.2 STATE Missions

A STATE Mission completes whenever its condition is currently true, even if the condition was already true when you drew it, unless the Mission specifies a timing such as "At the end of the round."

11.3 EVENT Missions

An EVENT Mission completes only when its qualifying event occurs while the Mission is in your hand. Events that occurred before you drew the Mission do not count.

11.4 Completing a Mission

When a Mission completes, score its VP immediately unless the card says otherwise. Place it face-up in your completed Mission area; it leaves circulation. Immediately draw a replacement to maintain your current Mission-hand size. If no Mission is available for a required draw, Mission Exhaustion ends the game immediately.

11.5 Mission Gambit — Shock

1. Draw 2 Mission Cards.
2. Keep 1 and place the unchosen Mission on the bottom of the Mission deck.
3. After seeing the new Mission, you may discard 1 Mission you already hold to the bottom of the deck and draw 1 replacement.
4. After the full effect resolves, if you hold more than 5 Missions, choose which Missions to discard to the bottom of the deck until you hold 5.

11.6 Mustard Gas — Shock

Roll 3 Attack Dice separately for each of the opponent's Zones 1, 2, and 3. Each Hit forces 1 exposed enemy Soldier in that zone to Retreat directly to its Trench reinforcement area. Choose the affected exposed Soldiers. Soldiers in Cover are unaffected. The Objective Zone is unaffected. Mustard Gas does not damage Cover, Machine Guns, Mortars, or Tanks.

If forced Retreats would exceed the 5-Soldier reinforcement-area limit, eliminate the excess retreating Soldiers. These capacity eliminations do not count toward Mission requirements.

12. Regroup and End of Round

12.1 Regroup

1. Each player may spend unused natural Whistles. For each Whistle spent, draw 1 Event Card, up to the 7-card hand limit. There is no automatic Event draw.
2. For each draw, take 1 face-up Event from the 3-card Event Display or blindly draw the top Event Deck card. Immediately replace a displayed card that is taken. Wilds cannot become Whistles for this Regroup draw, and drawn Events cannot be played until the following round.
3. Resolve any effect that specifically triggers during Regroup.
4. Reset or lose all remaining unused Action Dice. Dice never carry into the next round.

There is no automatic Soldier reinforcement during Regroup.

12.2 End-of-Round Resolution

1. Check STATE Missions that specifically say "At the end of the round," such as Dug In and Breakthrough.
2. Resolve other end-of-round effects and expire effects that last until the end of the round.
3. Move all Soldiers still in Current-Round Casualties to their owner's available Soldier supply.
4. Check whether Mission Exhaustion has ended the game.
5. If this was the selected final round, determine the winner. Otherwise advance the Round marker and begin the next Initiative Phase.

12.3 Current-Round Casualties

Whenever a Soldier is eliminated, place it in that player's Current-Round Casualties area in the Trench rather than immediately returning it to the available supply. This lets effects such as Field Hospital identify Soldiers eliminated this round. A Soldier eliminated solely because it could not enter the 5-Soldier reinforcement area does not count toward Mission requirements. At end-of-round cleanup, all remaining casualties return to the available Soldier supply.

13. Scoring and Game End

Scoring Event	VP
Gain Control of the Objective Zone	3 VP
Gain Control of one enemy-side Zone	1 VP
Move a Tank from enemy Zone 1 into the opponent's Trench	1 VP
Complete a Mission	VP printed on the Mission

13.1 Territorial Scoring

Score territorial VP immediately when you gain Control. Continued Control does not score again each round.

A temporary Contested state does not reset a zone for repeat scoring. If a Tank leaves a zone, re-evaluate Control, but a player who gains Control solely because the Tank departed does not score territorial VP for that departure. Otherwise, to score the same zone again, your opponent must first gain Control of it; if you later recapture it, you score again.

13.2 Game End

The game normally ends after Round 8, 10, or 12, according to the chosen Battle Format. Mission Exhaustion may end it earlier. Highest VP wins; ties use Objective Control, then most enemy-side Zones controlled, then a Draw.

14. Quick Reference

14.1 Round

ROUND Roll 1 / Initiative → Player 2 rerolls and commits visibly → Player 1 rerolls and commits → Player 1: Shock / Tank Move / Event / Deploy-Repair / Soldier Move / Cover-Shovel / Attack → Player 2 same sequence → Regroup → End of Round

14.2 Action Dice

Symbol	Quick Use
Boot	Move 1 eligible non-Tank Unit 1 zone.
Shovel	One Cover action.
Bayonet	Repair 1 / Mortar 2 / MG 3 / Tank 4.
Whistle	Play 1 Event in the Event Step; draw 1 in Regroup.
Wild	Copy a natural Action symbol in your committed pool.
5 matching	Spend all 5 for Mission Gambit or Mustard Gas.

14.3 Combat

Unit	Attack / Special
Soldier	1 die each; same/adjacent; Tank only same-zone Close Assault.
MG	3 dice; 4 into Objective; range 2; move OR attack; no Tanks.
Mortar	Mortar Die; 2 Hits; move OR attack; no Tanks.
Tank	3 dice same/adjacent OR Overrun; 3 Damage; forward move 0–2.
Cover	Occupied: Defense absorbs Hits. Empty: Hits ≥ Defense destroys.

14.4 Control and Scoring

Item	Rule
Soldier	Control 1; Control 2 in Cover.
MG / Mortar	Control 2 undamaged; 0 with 1 Damage.
Tank	Control 0 and makes zone Contested.
Objective	3 VP when Control is gained.

Item	Rule
Enemy-side Zone	1 VP when Control is gained.
Tank in enemy Trench	1 VP, then Tank returns to supply.

15. Core Terms

Term	Meaning
Available Supply	Your off-board pool of Units available for deployment or reinforcement.
Battlefield Zone	A numbered Zone or the Objective Zone. The Trench reinforcement area is not a battlefield zone.
Contested	A zone containing any Tank. Controlled by neither player.
Control	You have greater eligible Control Value in the zone and it is not Contested.
Current-Round Casualties	Trench board area for Soldiers eliminated this round.
Damage	Damage placed on Machine Guns, Mortars, and Tanks. Damage is not a Defense threshold.
Enemy-side Zone	One of the opponent's Zones 1–3; not the Objective Zone.
Exposed Soldier	A Soldier not occupying a Cover Position.
Retreat	Move the affected Soldier directly to its owner's Trench reinforcement area; overflow is eliminated.
Trench reinforcement area	Off-battlefield Soldier reserve with a maximum capacity of 5.

Card text wins. When an Event, Mission, Shock effect, or scenario explicitly creates an exception to a general rule, follow the specific text.
